It Is Just
The Beginning . . .

A Time For Launching Dreams . . .

'It is just the beginning, a time when a person begins to grow increasingly independent. Traveling the long and confusing road through high school each of us encounters someone who makes this time less confusing and more enjoyable. This individual has contributed much to the development of character and knowledge through her efforts and understanding. Therefore, with pride and sincere gratitude the 1975 Shield is dedicated to Mrs. Betsy Wood.

And Learning The Meaning of Them . . .

For Ourselves

Reality is not an exhibit for man's inspection, labeled: "Do not touch." There are no appearances to be photographed, no experiences to be copied, in which we do not take part. We re-make nature by the act of discovery, in the poem or in the theorem. And the great poem and the deep theorem are new to every reader, and yet are his own experiences, because he himself re-creates them. Jacob Bronowski

Alone, an Individual explores only the thoughts and ideas of himself, but the ideas of man become reality only by means of experience.

A CLASS PROPHECY

Ten years from now, when you pick up this annual, you will have access to at least 15 new electric appliances that don't even exist today!

Electrical innovations will "make the scene" (as we say in 1974) to benefit health, education, industry and our social lives. You'll also see in the next decade more electronic equipment to purify, filter, recycle and generally clean up America.

Electricity is doing a lot of things for you now. It's going to do a lot more tomorrow. Our prediction: Life will keep on getting better — electrically.
